

Adam Pękul

About Me

Aspiring Frontend Developer with three years of hands-on, non-commercial experience in JavaScript and React, complemented by a strong foundation in web development projects. Transitioning from a successful career as a Service Desk Specialist, where I honed my technical support and problem-solving skills. Known for excellent communication and a keen eye for detail, I am passionate about creating intuitive and responsive user interfaces. Eager to leverage my substantial frontend experience and background in technical support to contribute to innovative development teams.

Individual projects:

1. E-Commerce A minimalist app imitating an online store, designed in Figma and built using React and Scss. Demo Link GitHub Repository Link	3. Split bill app Mobile app to track bills and other shared expenses, so that everyone gets paid back. React Native. GitHub Repository Link
2. Drink/Cocktail Search Website Drink/Cocktail database website with one page user friendly design. Search for drink/cocktail by it's full name, first letter or ingredient and see how to prepare them. Demo Link GitHub Repository Link	4. Task Management Trello-like with drag-and-drop functionality, task management app created with use of React, TailwindCss, React DND Demo Link GitHub Repository Link
